DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a composition of high density lipoprotein.

Group II, claim(s) 6. drawn to a method of treatment of organ dysfunction.

The inventions listed as groups I-II do not relate to a single general inventive concept under PCT rule 13.1 because, under PCT rule 13.2, they lack the same or corresponding technical features for the following reasons: the composition of group I lacks novelty (i.e., it is anticipated by prior art reference)- see, e.g., USPN 5,780,592. Thus, the special technical feature which links the claims does not provide a contribution over the prior art (with respect to group II) so unity of invention is lacking.
